

## Technology's Got Talent Case

A prestigious company dedicated to the field of Health wants to implement a tool that helps to search for doctors of different medical specialties in a certain area or region.

For this requirement is necessary to consider the following points

1. Filter searches by Medical specialty and City

Medical specialty

Search

City

Doctor 1

View

Doctor 2

View

Doctor 3

View

2. Show specific detail of the information of each Doctor (Name, Rating, Specialty, Address)

Doctor

Full Name

Rating (Average  
Patient Rating)

Specialty

Address

3. Show detail of each patient's comment and their respective ratings.

### Patient Reviews

Patient 1

Rating XXX

Bla bla Bla Bla

Patient 2

Rating XXX

Bla bla Bla Bla

Patient 3

Rating XXX

Bla bla Bla Bla

Patient 4

Rating XXX

Bla bla Bla Bla

4. The patient will have the possibility of entering a new comment to a Doctor, as long as the patient is registered in the system (observation: in this exercise it is not necessary to include the implementation of the Login and Registration of new patients).
